UPDATED TOWERLINE

The updated TowerLine workbenches are now more user friendly, versatile and flexible and they are designed for use in research, R&D and educational environments. Robust and whole module length shelves enable ergonomic use of measurement instruments and unique cable management system helps to keep the workstation tidy.

TowerLine workbenches are available in three module sizes: M1200, M1500 and M1800. The bench top depth is 750 mm and both laminate and ESD bench tops are available. The frames are painted with our new standard light grey, RAL 7035 (ESD). Frame load capacity is 300 kg/section (module) of even load, of which 200 kg on bench top. Delivery time is 15 working days.

Besides single-sided frame, also extension and corner frames are available. In addition, the single-sided workstation can be easily changed into a double-sided workstation by adding the bracket set and bench top and by moving the vertical feet into middle of the horizontal feet.
Single-sided frame includes two side feet, and these side feet will be placed outermost when building an extension or corner workstation as both extension and corner frames include only one middle foot.

The height of the bench top is freely adjustable, as the height is adjusted by the bench top brackets that will be installed into the integrated uprights.

The cable management is easier than before, as the vertical feet are now hollow and there are four cable management holes in both feet (diameter 50 mm). In the top of the vertical foot there is a metal end plate that can be bended inside in order to have more space for the cables.

The rear case is updated with five cable management holes (diameter 60mm, compatible with UK plug). In addition, an energy rail can now be attached to the rear case.

In addition to the below mentioned accessories, TowerLine workbenches can be equipped with accessories with arms (Ergonomic workspaces catalogue pages 34-35). For those accessories an arm holder is needed:

- 861098-49, for 40 mm arm, f.ex. Document holder 92849008
- 861099-49, for 60 mm arm, f.ex. LCD holder with double arm.

Drawer units 45/56, 45/66, 75/56 and 75/66 can be attached to the workstation by using drawer unit fixing set 854463-49.
