

## CONCEPT ALLEN KEY AND CRANK FRAMES WITH IMPROVED FRONT LIST

Concept allen key and crank adjustable workbench frames are now better than ever. The front list will be replaced with the same type of C-profile than we have used in Concept motor adjustable frames for years.

This improvement has several advantages:

- **The C-profile enhances the rigidity of the front edge of the bench top especially in the wider frames (1500-2000 mm).**
- **The loading capacity of the 600 mm deep allen key frames is now 500 kg (instead of 200 kg).**
- **One drawer unit fixing set suits all the sizes of the allen key and crank adjustable frames: 890653-49 (Previously there were three different fixing sets for allen key and crank frames).**
- **Drawer unit fixing is no longer depending on the ready made holes in the front list as the drawer unit will now be attached with locking parts to the C-profile and with screws to the bench top.**
- **Corner and extension frames are easier to assemble and have various possibilities, also the left extensions and corner frames are now available as standard.**

This improvement concerns all the standard models, item codes and prices will remain the same. Listing of the item codes available on page 3

### AVAILABILITY AND PRICES

- Item codes and prices will remain the same.
- The carton boxes of the frames with new front list are marked with sticker "new".
- The transition period is estimated to be during weeks 12-15, depending on the model and stock amounts of the old model.
- Assembly instructions for the new frames have new assembly instructions ID. Please find the listing at the end of this product news.
- Extension and corner frames have the standard rear case, so the upright tube modules can be used in the same way than in the complete frames.

### DRAWER UNIT FIXING SET

- During the transition period customer service will add the new drawer unit fixing set 890653-49 free of charge to those Concept allen key and crank bench orders that have any of the following old drawer unit fixing set. This way the drawer unit can be fixed to the frame regardless of the model (old or new):
  - 860239-49
  - 860930-49
  - 860931-49
  - These old drawer unit fixing sets will be available until 31.12.2019.
- The price of the drawer unit bracket set 890653-49 is the same than of the fixing set for motor benches, i.e. 854463-49 (which will be still used with motor frames).
- Separate product leaflet will be available for the drawer unit fixing set.

### WEBSITE AND ERGONOMIC WORKPLACES CATALOGUE

- Website will be updated 1.4.2019:
  - new frame pictures
  - 600 mm deep allen key max load 500 kg
  - new drawer unit fixing set 890653-49 (old ones will be removed)
  - extension and corner frame (left) item codes
- Ergonomic workplaces catalogue (04/2019) will be updated during April as pdf and Flipbook.
